

HANDY CROSS

The ideal sweeper to work on uneven surfaces on indoors and outdoors environments. Handy Cross Max 73 is equipped with two pneumatic wheels that absorb shock which makes them ideal to work on rough surfaces, in areas where crushed stone, gravel, grass may present. They are naturally quieter than standard wheels, and this can provide better working conditions when they are used indoors.

The front pivoting wheel large 37.5mm allows a better grip and smoothness. The two rear pneumatic wheels have a diameter of 260 mm and 85 mm in width.
